Figure 1. ShakeAlert initial earthquake location (black dot). Star is ANSS earthquake epicenter. Polygon shows estimated MMI 4 shaking intensity area. If shown, red circle is front of peak shaking when the message was released***. Shaking takes 10 s to expand from circle to circle.

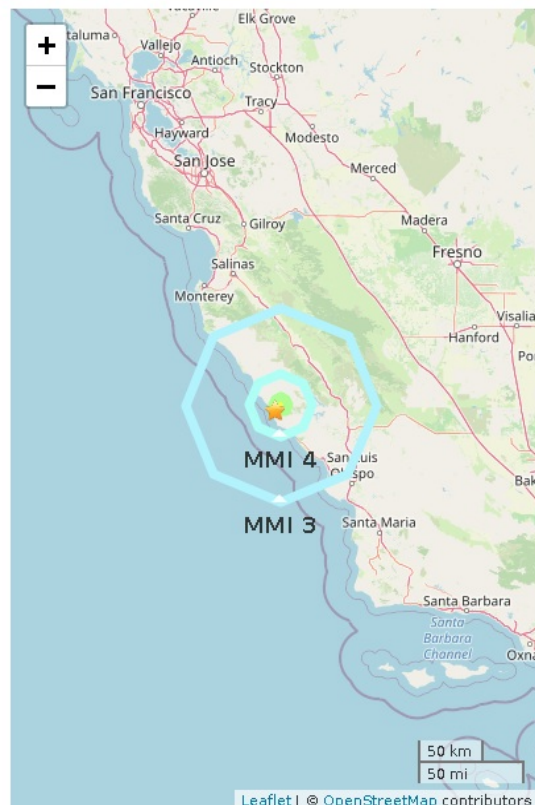

Figure 2. Polygons show shaking intensity contours for the peak magnitude estimate. Shaking of MMI 3 or less is often not felt. Star shows the ANSS earthquake epicenter.
